## 3. Description

Fittings and hardware for chain link and related fence/gate systems, manufactured in the United States using American produced steel. Products are designed for commercial, industrial, and infrastructure projects where Build America, Buy America Act (BABA) compliance is required. Typical finishes include hot-dip galvanizing or powder coating over galvanizing.

## 4. Technical Data

**BABA Compliance.** Complies with Pub. L. 117-58, §§ 70901–70927 (Build America, Buy America Act). Iron and steel content is melted and poured in the United States; all manufacturing and coating operations for designated items occur domestically.

**Material.** American-produced carbon steel; typical grades A36/A1011/A1018 or equivalent for stampings/fabrications; ASTM A307 for carbon-steel fasteners (where applicable).

**Coatings.** Hot-dip galvanizing per ASTM A153 (hardware) and/or ASTM A123 (fabrications), with optional powder coat over zinc. Field touch-up per ASTM A780.

Applicable Standards (as specified for project):

- **ASTM F626** (Fence Fittings)
- **ASTM A153/A123/A780** (Zinc Coatings & Repair)
- **ASTM A307** (Carbon-Steel Bolting)
- **ASTM F1083 / ASTM F1043** (Framework, where referenced)
- **AASHTO / FHWA BABA** implementation guidance (as applicable by agency)

**Quality & Traceability.** Heat/lot traceability maintained; mill test reports (MTRs) and domestic melt certificates on file for designated items.

Compliance & Documentation (available upon request):

- **Certificate of Domestic Origin** (DF Supply, Inc.)
- **BABA Attestation** (iron/steel melted & poured in USA; domestic manufacturing/coating)
- **Mill Test Reports (MTRs)** and heat-lot documentation
- **Process Flow & Facility Declarations** (manufacturing and coating locations)
- **Certificate of Compliance (COC)** to listed standards and project specifications

## 5. Cost & Availability

Common items are stocked for quick shipment from Twinsburg, OH. Project-specific and powder-coated items ship per quotation and schedule. Volume pricing, contract pricing, and agency terms available.

## 6. Maintenance

Inspect annually for mechanical wear and finish condition. Clean with mild detergent and water; avoid aggressive chlorides and abrasive tools. Repair coating per ASTM A780 as needed. Replace hardware showing deformation, severe corrosion, or thread damage.

## 7. Technical Services

Technical submittals, cut sheets, take-offs, and compliance packages are available. Contact DF Supply, Inc. for product selection, specification matching, and agency documentation.

## Legal Notice & Limitations

This one-page specification covers **only** those SKUs explicitly identified as “Made in USA — BABA Compliant.” DF Supply, Inc. maintains product-level documentation to substantiate domestic origin and BABA status. Where a listed item is not designated as Made-in-USA/BABA Compliant, a separate specification applies. Always verify the product’s designation on the product page and in the project submittal package.
